Village of Franklin 2017/2018 Road Rehabilitation Program

The Village of Franklin is pleased to announce that Cadillac Asphalt, LLC, will commence work on the Village-wide 2017-2018 Road Rehabilitation Program beginning the week of June 12, 2017, weather permitting. The initial work includes sawcutting and removing several driveway approaches, removing and replacing driveway culverts, and ditch cleanout, as necessary. Not all homes will be affected by the driveway/ditching work. **Receipt of this flyer indicates that your driveway approach and culvert will be replaced and/or the ditch in front of your house will be cleaned out.** Driveway/culvert removals will also be marked with paint. **There will be short periods of time where you will have limited access to your driveway when pavement and the culvert is removed and when the new culvert is installed and the driveway approach is constructed.** An HRC Field representative will also attempt to contact you to discuss the work prior to the work commencing. The ditches that will be cleaned out will also be marked with paint.

In addition to the aforementioned work, **all roadside rocks/boulders that are closer than 3' behind the edge of road will be moved back to a distance of between 3' and 5' from the edge of road.** Care will be taken so as not to damage anything on the property (fences, landscaping, sprinkler heads, etc.) or to impede stormwater drainage (such as in a swale/ditch line).

A minimum of one lane of traffic in each direction on each road will be maintained at all times. Please note the following reminders:

- **It shall be the responsibility of each homeowner who has sprinkler heads to mark or expose sprinkler heads** located near edge of road and driveway areas and shut down the adjacent zones before construction begins. Neither the contractor or the Village is responsible for damage to unmarked sprinkler heads.
- **Please do not park in or near your drive approach, along ditch areas, or adjacent to rocks/boulders that are marked for rehabilitation/relocation.**
- **If a homeowner has specific needs such as home care, emergency care, or special events that will be held at their house, we ask you to please contact the Village Engineers via email or phone so the contractor is aware of the situation and we will all try to accommodate as much as possible.**

Please obey posted construction signs and exercise caution around the work crews in the area during construction. Every effort will be made to minimize any inconvenience to all area property owners and patrons. Your patience and cooperation is appreciated during this time. If you have any special needs, questions, or complaints not already addressed by this flyer, please feel free to contact the HRC Field Observer (white hard hat) or any of the following persons:
